

SCOPEX₂[™]

Get Your Power On!

Double the range of your scope with the quick-switch scopeX₂[™] adapter.

Whatever your scope's current range, the scopeX₂[™] will magnify it by exactly 2x. Your 2x scope setting becomes 4x. Your 8x scope setting becomes 16x.

Mount in front of your scope and use scopeX₂[™] built-in turrets to boresight for exacting accuracy. No need to adjust your scope.

Once properly sighted, remove and mount easily to adjust to changing field conditions.

The scopeX₂[™] offers the following features:

- Works with all scopes having front tube standard 30mm or 1-inch diameter
- Rapid removal and mount without re-sighting.
- Bore-sighting scopeX₂[™] turrets independent of scope adjustments
- Excellent low-light performance
- Allows twice the range/magnification of any mountable scope
- State of the art upgrade, superior optical quality
