

SCOPEX4™

Get Your Power On!

Quadruple the range of your scope with the quick-switch scopeX4™ adapter.

Whatever your scope's current range, the scopeX4™ will magnify it by exactly 4x. Your 2x scope setting becomes 8x. Your 8x scope setting becomes 32x.

Mount in front of your scope and use scopeX4™ built-in turrets to boresight for exacting accuracy. No need to adjust your scope.

Once properly sighted, remove and mount easily to adjust to changing field conditions.

The scopeX4™ offers the following features:

- Works with all scopes mounted 1.5"/38mm above picatinny rail
- Rapid removal and mount without re-sighting.
- Bore-sighting scopeX4™ turrets independent of scope adjustments
- Excellent low-light performance
- Allows four times the range/magnification of any mountable scope
- State of the art upgrade, superior optical quality

Magnification	4x
