

# B<sub>2</sub><sup>™</sup> Binoculars

The B<sub>2</sub><sup>™</sup> binocular is a top of the line open bridge unit with an amazing SuperHD performance. You are getting the high end premium binocular for a lifetime of reliable use. All lenses are fully multi-coated with our proprietary Diamond Bright coating for maximum glare reduction and light transmission, giving the viewer a satisfying, color-saturated view and exquisite optics suitable for long term, comfortable glassing of objects near and far. The BAK-7 HD (High-Definition) performance internal roof prisms are treated with cutting-edge phase-corrected dielectric coatings that limit dispersion and help minimize diffraction. The 7 element eyepiece system provides the best eye relief means enjoyable viewing for eyeglass wearers, and the remarkable close focus capabilities mean that a backyard bird or butterfly can be as sharp and in focus as a distant animal or galaxy. The magnesium body shaves weight and adds superior rigidity, while allowing a pleasing and ergonomic grip for any sized hands.
